

1st IEEE International Conference on Industrial Informatics
e-Logistics for a Fail-Safe World

Calgary, Canada
August 2003

Subject: Invitation to participate

Dear members of IEC TC65 / WG6,

Together with the leaders of the IEEE Industrial Electronic Society we recently founded a new Series of IEEE Conferences on *Industrial Informatics*, the first to take place in August 2003 in Banff, Canada, under the Logo 'e-Logistics for a Fail-Safe World'.

As it results from the Call for papers (<http://www.enel.ucalgary.ca/INDIN03/>), this initiative is meant to become the major forum for integration of the dispersed efforts led by academia and industry around the world into a strong, unified community dedicated to development and deployment of information technologies addressing current crisis of today's world dynamics. Our purpose is to bring together a community balancing academia and industry leaders into a joint effort to find solutions and define international standards in the area of industrial information technologies.

We strongly feel that IEC TC65 / WG6 should be an integral part of our synergetic body, so that we can work together in accomplishing our mission better. For this reason, we would like IEC TC65 / WG6 to be represented stronger - by a Tutorial or Key Note - on IEC results in Industrial Informatics for our Conference.

With the hope that you will accept our invitation we look forward to work together with you towards the success of our Conference!

Sincerely Yours,

Dr. Mihaela Ulrieru – General Chair

Dr. Armando Colombo – General Co-Chair
